

Ref TW-BINS-001 Rev P01 4 October 2026 All dimensions in metres. Scale 1:50 at A3

PLAN (hoarding shown heavy; bins, wall and canopy for context only)

Set out from the left return. Total run 8.40 m, height 2.40 m.

WHY THIS ARRANGEMENT

1. A 1.20 m gate in the front run lets the bins be wheeled out on collection day. A doorway does NOT split the hoarding into two structures (TWf B.6).
2. 225 mm deep posts at 2.00 m c/c beats a fatter post: stiffness goes with depth cubed.
3. Facing outside the posts keeps the bay clear and stops the boards being levered off from inside.
4. Returns are 1.20 m - less than the 2.40 m height - so no return-corner credit is taken in the wind check.
